

Integrated Software Technologies Inc.

Integrating the Software Technologies of Today into the Products of Tomorrow

*Manufacturer of VisiNet™.
Your complete solution to Industrial
Controls and Network Management.*

IST

Since 1996, Integrated Software Technologies has been providing the Satellite Communications Community with products to handle all of their Network Management requirements. With systems in operations throughout the globe, IST has proven itself as a world class supplier of reliable, cost effective Network Management products. From complete Satellite Earth Station management, to Automated Manufacturing, Industrial Weighting, and Robotic control systems, IST can provide cost effective, robust, reliable products and services to meet all your Network Management needs.

VisiNet™

IST's Flagship Network Management System (NMS) product, VisiNet™, is ideally suited to provide Local and Remote management capabilities to many different industries and applications including:

- Satellite Communications
- Automated Manufacturing
- Industrial Printing
- Robotic Control

Custom HW/SW Products

In addition to the standard VisiNet™ product, IST can provide custom HW/SW solutions to meet just about any requirement your company may have. From Real-Time Embedded HW/SW based products, to stand-alone and distributed client/server PC based applications, IST has the experience and resources to design, develop, and deliver your custom product on-time and within budget. IST has developed numerous custom products for various customers, ranging from communication controllers and converters, to mission critical redundancy switch controllers and remote device access portals. We work closely with the customer to make sure that the final product not only meets the specified requirements, but also has the capability to grow and expand to handle any future additional requirements. IST's resources and business partners allow us to handle all aspects of custom product development including initial product specification and requirements definitions, HW design, development, and procurement, SW design and development, system testing, product packaging, and documentation of all levels. In many cases, we can provide these services on a Fixed Price basis, limiting the amount of risk associated with such projects.

Total Customer Satisfaction

IST is committed to providing TCS (Total Customer Satisfaction). We achieve this by working hand in hand with the customer throughout all phases of the product life cycle, from initial contact, to support issues years down the road, while treating each and every client as our best customer. With unparalleled customer support, and a corporate mandate for the highest level of integrity and product quality, IST provides its customers with a buying experience rarely found in today's high paced business environment. Call us today and let us show you how IST can help you achieve your goals.
